

APPLICATION FOR THE SELOVE PRIZE SUMMER RESEARCH SCHOLARSHIP

Department of Physics, University of Chicago

Name (print) Misha Usatyuk Year in School 3

Name of proposed faculty supervisor Cheng Chin

(Please be aware that we may contact him or her for the purpose of considering this application.)

List the physics and math courses you have taken and your grades in these courses:

Undergrad

Phys 197 - Stat Mech: A

Phys 225/227 - EM I+II: A

Phys 234/235 - QM I+II: A

Phys 185 - CM: A-

Phys 211 - Exp Physics I+II: A

Grad

Phys 443/444 - QFT I+II: A

Phys 385 - Rep Theory: A

Currently

Phys 445 - QFT 3

Phys 352 - Stat Mech

Phys 211 - Exp Physics III

Describe any research experience you have and with whom/where you worked (use separate sheet if needed):

I have worked under Prof. Chin for almost a year now. In that time I have written control system software and imaging software. I have also worked on machining and building electronics/working with programmable microprocessors. I have included my past work below.

Past Projects

-Wrote system control software for new experiment (Labview)

-Wrote imaging control software (Matlab)

-Built water-cooled current controller (Electronics, Machining)

-Built programmable, general purpose feedback circuit (Electronics)

-Ran simulations/calculations for levitation experiment

If you already have a research plan for the summer (not required) please include a description.

Affirmation: To receive a Selove Research Award, the applicant must spend approximately 10 weeks of the period between the Spring and Autumn quarters in 2016 performing research with a faculty supervisor.

☒ I have read and understood the above statement. If I accept a Selove Scholarship, I agree to spend most of the summer engaged in research.

Signature Misha Usatyuk Date April 8, 2016
